Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-8, drawn to a semiconductor memory device connected between a processor and an instruction cache, and a selector selectively outputting an instruction code stored in an instruction buffer and instruction cache according to a determination result, classified in class 711, subclass 125.

Group II. Claims 9-13, drawn to a software development apparatus for generating a load module from a source file, the consecutive instructions extracted by an extraction section, and an address information reformatted by a reformatting section, classified in class 717, subclass 162 (discussed with Examiner Ted T. Vo in class 717).

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the invention in Group I and II has separate utility because the invention of group I has the utility for a semiconductor memory device connected between a processor and an instruction cache, and a selector selectively outputting an instruction code stored in an instruction buffer and instruction cache according to a determination result, the invention

of group II has the utility for a software development apparatus for generating a load module from a source file, the consecutive instructions extracted by an extraction section, and an address information reformatted by a reformatting section. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and because the divergent searches required for the different groups, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jasmine Song whose telephone number is 571-272-4213. The examiner can normally be reached on 8:00-4:30.
